Infosys Springboard Program Report

The Infosys Springboard initiative has played a pivotal role in enhancing the skill sets of students and providing them with valuable opportunities for growth and development.

Below are the key highlights and programs that have taken place under the Infosys Springboard:

1. Selection of Student for Internship under "Pragati"

We are proud to announce that **Rahitya**, U01CT23S0048, IVth Sem BCA, student from our college, has been selected for an internship under the Infosys Springboard **Pragati: Path to future program**. This program was specifically designed for female students, providing them with an opportunity to gain practical experience and insight into the tech industry. Rahitya's selection showcases the program's commitment to promoting gender diversity in tech and empowering women to pursue careers in this field.

2. Certificate Submission for Industry Readiness

As part of our continuous efforts to prepare students for industry demands, we launched an initiative encouraging students to complete certification courses in relevant technologies and fields. Although this program was primarily intended for final-year students, we are pleased to report that students from various classes enthusiastically participated and completed the courses.

To further motivate students, a 5-mark incentive was offered upon submission of course completion certificates. This approach significantly boosted participation and reinforced the importance of upskilling in alignment with current industry trends.

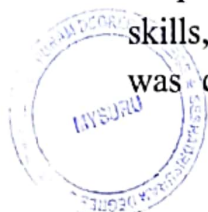

Sl.No	Class	No of certificates collected
1	II BCA	96
2	III BCA	108
3	II BBA	157
4	III BBA	25
5	III B.Com	57
	Total	443

Outcome

A total of 443 certificates were collected, reflecting enthusiastic participation across all streams. This initiative not only boosted student morale but also aligned academic learning with the evolving demands of the industry.

3. Student Empowerment Program: Front-End Development Technologies

As part of our ongoing efforts to empower students with industry-relevant skills, a Certification Program on Front-End Development Technologies was conducted. The initiative was aimed at equipping students with

foundational web development knowledge, helping them stay ahead in a technology-driven job market.

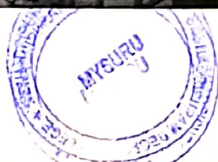

Program Highlights:

- Course Focus: HTML, CSS3, and JavaScript.
- Duration: 17th March to 21st March.
- Participation: Over 100 students from BCA academic stream.
- Successful Completions: 95 certificates collected.

Program Impact:

- Students gained hands-on experience in building responsive and interactive web pages.
- Enhanced employability through the acquisition of practical and in-demand development skills.
- Fostered an environment of self-learning and technical curiosity.

The enthusiastic response and successful completion by 95 students underscore the growing interest in tech-oriented learning and the success of our empowerment initiatives.
